**GI HEALTH**  
AND YOUR PET

GI HEALTH

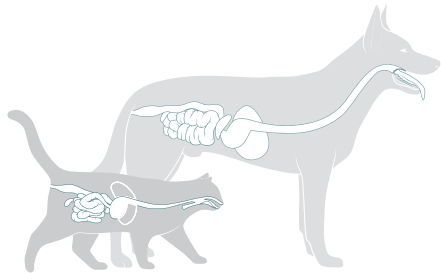

## GI HEALTH

There are four main functions of the gastrointestinal track:

- Transportation
- Digestion
- Absorption of food
- Excretion of waste products

The mucosal integrity of the gastrointestinal tract and the functioning of its accessory organs are vital in maintaining the optimal health of your pet.

The GI tract is actually the largest component of the body's immune system and it plays an important role in helping your pet stay healthy. It is also involved in regulating their body's hormonal systems.

Your veterinarian may recommend supplements such as **Aventi GI Complete** or **Aventi GI Essentials** to help restore, heal, support and manage their GI tract – either proactively or as the result of a medical condition!

## NEW! AVENTI GI ESSENTIALS (POWDER IN SACHETS)
