

EYE CARE AND YOUR PET

AVENTIX

Optixcare®

The
**MOST
TRUSTED
BRAND**

among animal eye
care specialists.

Help revitalize your pet's eyes and get them back to their normal self

Works up to 7 times longer than human products

Optixcare® Eye Lube Plus works twice as hard using Carbomer and Hyaluron. Carbomer holds water, extending the comfort. Hyaluron helps regenerate the cornea and enhances lubrication, providing a sustained amount of relief.

Soothes and comforts

Dual polymer action works twice as hard to soothe and comfort your pet's irritated eyes.

Available through Vets

A truly superior product, created specifically for pets, available through your veterinarian. Why would you settle for a substitute?

Easy to use

Just one to two drops per eye is all that is needed to provide the longest lasting relief.

Improve corneal healing and eye comfort.

Quicker healing, less pain.

Optixcare® Eye EMS contains a patented ReGeneraTing Agent called RGTA®.

RGTA® accelerates the speed and enhances the quality of tissue repair by acting as a secure foundation upon which corneal healing can occur.

Optixcare® Eye EMS reconstructs and preserves the structure of the cornea, creating a cellular microenvironment that is favourable to healing.

Well accepted

Does not sting

Easy to apply

Only 1 drop per affected eye every 2 days

Ready to use

1 sterile mono dose vial per application

Offers the
**BEST
OUTCOME**
for your pets
with corneal
ulcers

Maintain your pet's eye health, with superior antioxidant support, for years to come

4 powerful antioxidants, for a proven anti-aging effect

Optixcare® Eye Health helps your pet's eyes stay healthier, longer—especially in short-nosed breeds. Specifically designed with the power of 4 key antioxidants, Optixcare® Eye Health has been scientifically proven to reduce stress, delaying the onset and slowing the progression of age related diseases.

RESVERATROL

Reduces oxidative stress associated with age-related diseases.

EGCG

Helps protect the eye against UV induced damage.

ASTAXANTHIN

6,000 times stronger than Vitamin C, 550 times more powerful than Vitamin E.

PYRUVATE

An antioxidant that reduces inflammation in eye tissues.

Easy to use

Only one drop of Optixcare® Eye Health per eye twice daily is enough to keep your pet's eyes healthier, longer.

Optixcare® L-Lysine Chews relieves symptoms associated with Feline Herpes

Two chews a day keeps symptoms at bay

Studies have shown that 500 mg of lysine twice daily (250 mg twice daily for kittens) reduces the severity of conjunctivitis and reduces spontaneous and unpredictable eye discharge or drippy eye (viral shedding) in cats infected with Feline Herpes.

With exactly 500 mg of lysine per chew, Optixcare® L-Lysine Chews are designed to give cats the perfect dose every time—with minimal effort.

Only 6 kcal each

Great for diabetic cats or cats that are trying to watch their weight.

Safe to eat

No need to worry if cats love them too much, Lysine is safe at relatively high oral dose levels.
